F-Droid

English

MAXS Module FileRead

A Module for MAXS

This is a Module for MAXS, which does not install any launcher. You need "MAXS
Main" and a configured MAXS Transport to make use of it.

The FileRead module can be used to browse the storage device. Send files over
transports that allow it.

Versions

Although APK downloads are available below to give you the choice, you should be aware that by installing that way you will not receive update notifications and it's a less secure way to download. We recommend that you install the F-Droid client and use that.
