Element Pack Pro Version 9.8.14 Released

Improvement Fix Element Pack

Fixed

- Widget CSS was enqueued after on Theme Builder pages because Elementor only enables widget assets for the queried post, never for the template — Mega Menu's mobile/desktop header switch was the most visible case
- Header and footer Theme Builder templates were rendered twice per request, and the discarded first render swallowed once-per-request widget output such as Mega Menu's responsive breakpoint styles

Ultimate Post Kit Pro Version 4.2.0 Released

New Feature Improvement Fix Ultimate Post Kit

Added

- Added Item Limit option in the Query section of the stone hover widget
- Added mousewheel scroll support to the atlas slider widget
- Added Item Limit option in the Query section of the forbes tabs widget

Updated

- Security improved
- Reorganized the sline slider widget style panel into separate sections with proper conditional visibility

Fixed

- Fixed output escaping issues in multiple widgets
- Pause on hover control now only displays when autoplay is enabled
- Show Author and Show Time controls are not working in the optick slider widget
- Title Hide On, Text Hide On and Author Hide On controls not working in the optick slider widget
- Missing spacing between date and time in the atlas slider, berlin slider, checkerboard and classic list widgets
- Space Between control not working in the meta style section of the sline slider widget
- Missing spacing between clock icon and time text in the sline slider widget
- Reading progress circle widget showing NaN% on some themes and in the Elementor editor
- Missing separator and spacing between date, time, and reading time in the stone hover widget
- Extra bottom gap in the social link widget Elementor editor preview
- Show Time control not working in the eldora carousel widget
- Show Time control not working in the grove timeline widget
- Missing separator between date and time in the grove timeline widget

- Progress position control not working in the wixer carousel widget
- PHP warnings when switching tabs in the holux tabs widget

Element Pack Pro Version 9.8.9 Released

New Feature Improvement Fix Element Pack

Added

- WooCommerce integration with AJAX add-to-cart added in Price Table widget (footer button turns into a View Cart button after add, matching the EDD flow)

Fixed

- Visibility Controls "Country" condition not working issue fixed
- Calendly widget time control issue fixed
- Text Gradient Background extension ignoring custom gradient colors on headings issue fixed
- Post widgets (Post Grid, Post Block, Post List, etc.) query source and manual selection no longer list internal template post types — Theme Builder templates (`bdt-template-builder`), Mega Menu content, and Floating Elements are now excluded so only real content post types can be queried

Updated

- SEO issue fixed in Wrapper Link extension
- Price Table EDD and WooCommerce product selectors now use AJAX search instead of a limited preloaded list
- Security improved
- Breakpoint improved as Elementor in Mega Menu widget
