

Contact Form to Email

The best WordPress form builder. Contact / Booking form that sends the data to email and also to a database list and CSV file.

[Download \(/download\)](/download)[Go to Demo \(/home#demos\)](/home#demos)

Main Features

- ✓ Visual Form Builder: An incredible superb, intuitive visual/drag-and-drop form builder.
- ✓ Email delivery / notifications / auto-replies.
- ✓ Keep a database record of the received messages!
- ✓ Export to Excel / CSV, automatic reports
- ✓ Form Validation: Keep your data clean!
- ✓ Accept uploads, collect files and attachments.
- ✓ Anti-spam protection
- ✓ Mailchimp and phone SMS integration
- ✓ Classic and ajax (no need to reload the page) submission
- ✓ WooCommerce integration
- ✓ Payment / Booking form: Supports multiple payment gateways like PayPal, Stripe, Skrill, Authorize.net, SagePay, RedSys, Mollie/iDeal and more

[Check out all features \(/features\)](/features)

Contact Form to Email can be used for:

Contact form: Can be used like any other contact form where you can define the fields that will appear in the form, including text fields, checkboxes, drop-down, uploads, etc...

Payment/booking forms with direct integration with multiple payment gateways.

Creating advanced forms, example: Multi-page forms forms, form with conditional logic/dependant fields shown or hidden based on other field selections, export data to integrate with external services, etc...

Integrate with **WooCommerce** to dynamically calculate the price of products and use **the WooCommerce cart**

Contact Form to Email - The Best WordPress Form Builder.

100% No-Risk Money Back Guarantee!

If you don't like the plugin over the next 14 days, then we will happily refund 100% of your money.

All commercial versions have the **same full-set of features**, the difference is the number of websites the license allows.
