

API authentication and authorization bypass

IR Number	FG-IR-26-099
Published Date	Apr 4, 2026
Component	API
Severity	 Critical
Discovered	External
Attack Type	Unauthenticated
Known Exploited	No
CVSSv3 Score	9.1
Impact	Escalation of privilege
CVE ID	CVE-2026-35616

Fortinet has observed this to be exploited in the wild and urges vulnerable customers to install the hotfix for FortiClient EMS 7.4.5 and 7.4.6, by following the instructions at:

<https://docs.fortinet.com/document/forticlient/7.4.5/ems-release-notes/832484> - for FortiClientEMS 7.4.5

<https://docs.fortinet.com/document/forticlient/7.4.6/ems-release-notes/832484> - for FortiClientEMS 7.4.6

Upcoming FortiClientEMS 7.4.7 will also include a fix for this issue. In the meantime the hotfix above is sufficient to prevent it entirely.

Version	Affected	Solution
FortiClientEMS 7.4	7.4.5 through 7.4.6	Upgrade to upcoming 7.4.7 or above
FortiClientEMS 7.2	Not affected	Not Applicable

Acknowledgement

Fortinet is pleased to thank Simo Kohonen from Defused and Nguyen Duc Anh for reporting this vulnerability under responsible disclosure.
