 CVE-2025-50229.md

CVE-2025-50229: Jizhicms v2.5.4 SQL Injection

Vulnerability Overview

Jizhicms v2.5.4 is vulnerable to SQL injection in the product editing module.

Affected Product

- **Product Name:** Jizhicms
- **Affected Versions:** v2.5.4
- **Affected Component:** `app/admin/c/ProductController.php`
- **Affected Function:** `editproduct()`
- **Affected Endpoint:** `/index.php/admins/Product/editproduct.html`
- **Discovery Date:** 2025-04-24

Vulnerability Description

The application fails to adequately validate and escape user input submitted via the `body` parameter to the `/index.php/admins/Product/editproduct.html` endpoint, allowing an authenticated attacker to inject and execute arbitrary SQL statements.

Attack Type

Remote.

The attack requires an authenticated user who can submit content to the vulnerable endpoint.
