Report Timeline

Vulnerability was reported under the Open Source Security Foundation (OpenSSF) [Model Outbound Vulnerability Disclosure Policy: Version 0.1](#).

- [Jul 15, 2024](#) Maintainer Contacted to enable private vulnerability reporting
- [Jul 18, 2024](#) I opened a GHSA to report this vulnerability to the maintainer <https://github.com/PebbleTemplates/pebble/security/advisories/GHSA-7c6h-hmf9-7wj7> (private link)
- Jul 29, 2024 GHSA updated to ping maintainer about vulnerability, no response
- Oct 1, 2024 GHSA updated to ping maintainer about vulnerability, no response
- Nov 15, 2024 GHSA updated to inform maintainer that disclosure timeline had lapsed, no response.
- Feb 19, 2025 GHSA updated to inform maintainer that disclosure would occur imminently, no response.
- Feb 24, 2025 a new GHSA was created to disclose this vulnerability **without a patch available** ([GHSA-p75g-cxfj-7wrx](#)).

Member ...

I think that if we remove the `getLiteralTemplate` which uses a `StringLoader`, it would be sufficient to fix this vulnerability. Originally it was to address this [issue](#) but I'm comfortable to remove it. Don't think it's heavily used.
