

Commit f97d2bb

Raza Sharif committed 2 weeks ago

fix: enforce maxMessageSize in readRequestBody

The maxMessageSize configuration value was defined in DEFAULT_HTTP_STREAM_CONFIG (4MB) but never checked in readRequestBody(). This allowed unbounded request body accumulation, enabling remote denial of service via a single large HTTP POST request.

This commit adds size tracking in readRequestBody() and destroys the request if the configured limit is exceeded.

Fixes [GHSA-353c-v8x9-v7c3](#)
