fix: prevent integer overflow in memory size calculation for tensors #16481

Merged **mhs4670go** merged 5 commits into **Samsung:master** from **chunseoklee:bounty** last week

Conversation 4 Commits 5 Checks 13 Files changed 9

 **chunseoklee** commented last week Contributor

This commit addresses potential integer overflow issues in memory size calculations by:

- Changing num_elements type from int32_t to int64_t
- Adding overflow checks before size calculations
- Using large_num_elements() instead of num_elements()
- Casting final size to size_t after overflow validation

The changes affect BuddyMemoryManager and several kernel implementations (ExpandDims, If, Reshape, TransposeConv) to ensure safe memory operations with large tensors.
