# Duplicate Host header accepted

Low [Dreamsorcerer](#) published **GHSA-c427-h43c-vf67** 4 days ago

## Package

 **aihttp** (pip)

## Affected versions

&lt;=3.13.3

## Patched versions

3.13.4

## Description

### Summary

Multiple Host headers were allowed in aihttp.

### Impact

Mostly this doesn't affect aihttp security itself, but if a reverse proxy is applying security rules depending on the target Host, it is theoretically possible that the proxy and aihttp could process different host names, possibly resulting in bypassing a security check on the proxy and getting a request processed by aihttp in a privileged sub app when using `Application.add_domain()`.

Patch: [e00ca3c](#)Patch: [53e2e6f](#)

## Severity

Low

## CVE ID

CVE-2026-34525

### Weaknesses

- ▶ CWE-20
  - ▶ CWE-444
-
