Uncapped memory usage possible via headers/trailers

Moderate **Dreamsorcerer** published **GHSA-w2fm-2cpv-w7v5** 20 hours ago

Package

aiohttp (pip)

Affected versions

<=3.13.3

Patched versions

3.13.4

Description

Summary

Insufficient restrictions in header/trailer handling could cause uncapped memory usage.

Impact

An application could cause memory exhaustion when receiving an attacker controlled request or response. A vulnerable web application could mitigate these risks with a typical reverse proxy configuration.

Patch: `0c2e9da`

Severity

Moderate

CVE ID

CVE-2026-22815

Weaknesses

- ▶ CWE-400
- ▶ CWE-770
