Yes (please specify the tool below)

- Read the [Pull Request Guidelines](#) for more information. Note: commit author/co-author name and email in commits become permanently public when merged.
- For fundamental code changes, an Airflow Improvement Proposal ([AIP](#)) is needed.
- When adding dependency, check compliance with the [ASF 3rd Party License Policy](#).
- For significant user-facing changes create newsfragment: `{pr_number}.significant.rst`, in [airflow-core/newsfragments](#). You can add this file in a follow-up commit after the PR is created so you know the PR number.

Status	Branch	Result
✘	v3-1-test	Commit <code>6d01420</code>

You can attempt to backport this manually by running:

```
cherry_picker 6d01420 v3-1-test
```

This should apply the commit to the v3-1-test branch and leave the commit in conflict state marking the files that need manual conflict resolution.

After you have resolved the conflicts, you can continue the backport process by running:

```
cherry_picker --continue
```

If you don't have cherry-picker installed, see the [installation guide](#).
