Improve session generation #4

Closed as duplicate

jpsalvesen opened on Oct 6, 2017

The Apache::Session::Generate::MD5::generate() method is somewhat lacking. "time(). {}. rand(). \$\$" is too easily guessable.

It would be a good thing to use a better random data generator. There are several available at CPAN, among others:

- Data::Entropy
- Math::TrulyRandom
- Math::Random::Secure
- Crypt::Random
