 **mpirvu** commented 2 weeks ago Contributor

When JITServer does not use TLS encryption for communication an attacker may craft a TCP message that could cause the JITServer to crash.
 Link to description of the problem:
<https://github.com/eclipse-openj9/openj9/security/advisories/GHSA-q393-vr4c-969r>

This PR adds a buffer bounds check to prevent the crash.

  Prevent JITServer buffer overrun ... ✓ c5396b2
