botengyao commented on Feb 15 • edited Member

Fixed a issue where query parameter values added via query_parameter_mutations were not URL-encoded. Values from formatters like %REQ(header)% are now properly URL-encoded when added to the query string. This behavior is controlled by the runtime guard envoy.reloadable_features.header_mutation_url_encode_query_params .

- Commit Message:
- Additional Description:
- Risk Level: low
