Fix allow_origin_pat property to properly parse regex #603

 Merged[Zsailer](#) merged 2 commits into [jupyter-server:master](#) from[havok2063:fix_allow_origin_pat](#)  on Nov 2, 2021[Conversation 5](#) [Commits 2](#) [Checks 0](#) [Files changed 3](#)**havok2063** commented [on Nov 1, 2021](#)

Contributor

This PR fixes a bug with the `allow_origin_pat` which prevented the Jupyter server from recognizing and parsing regex patterns. Follows from discussions with [@mariobuikhuizen](#) on [mariobuikhuizen/voila-embed#24](#). Example traceback of the current broken implementation that this PR fixes is

Traceback (most recent call last):

Thanks, [@havok2063](#).

Because `allow_origin_pat` is a configurable **unicode** trait in the main `ServerApp`, I think we should preserve its type in this property as a unicode string. Instead, I suggest we replace all instances of `allow_origin_pat.match(...)` with `re.match(allow_origin_pat, ...)`

@Zsailer Yeah, no problem. I've made the requested changes and did a few checks that `allow_origin_pat` works as expected.
