# MiroTalk P2P

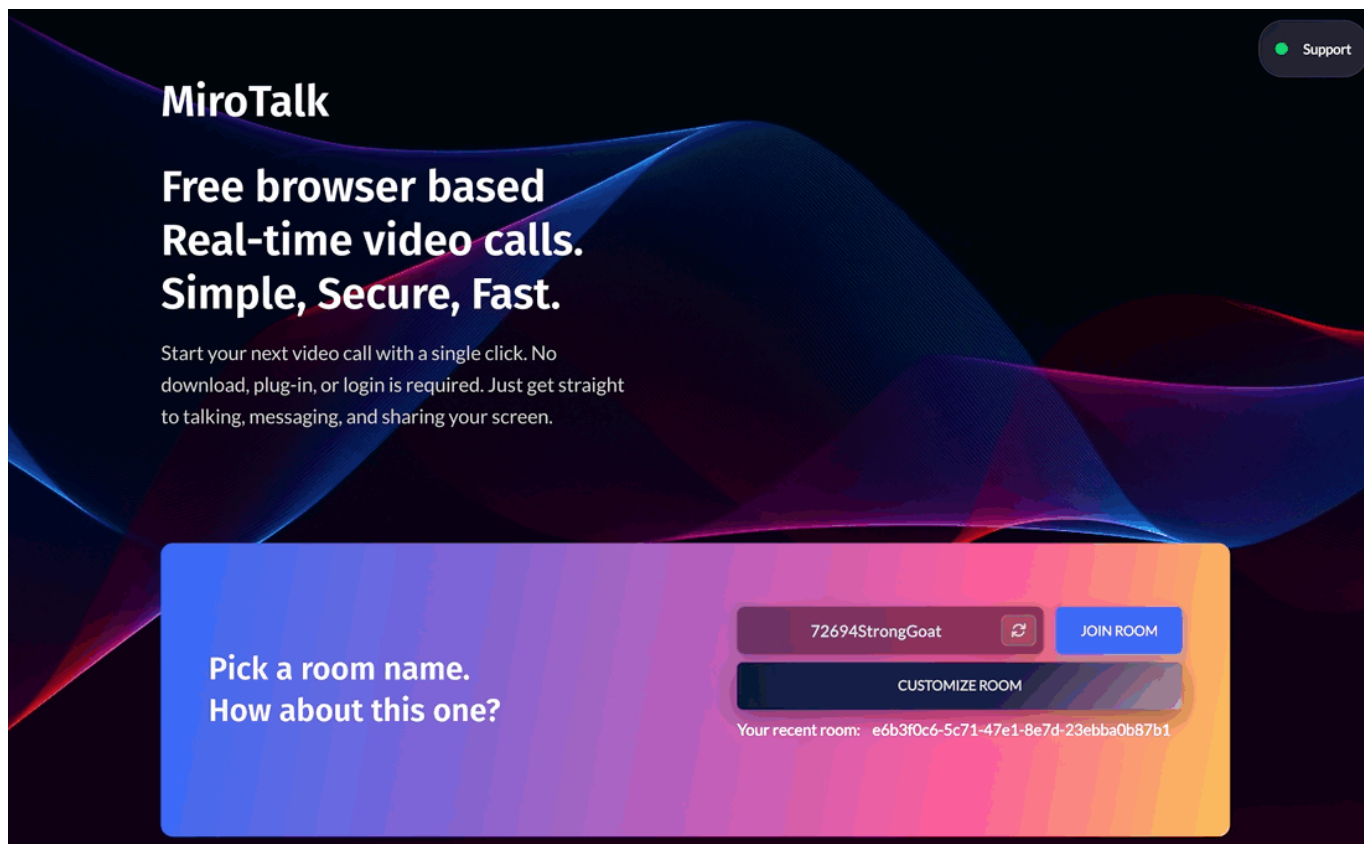

Open Source WebRTC P2P Video Conferencing You Can Self-Host in Minutes

Stars 4.4k Forks 709

License AGPLv3 Open Source docker pulls 170k last commit yesterday Discord Community Author Miroslav Pejic

MiroTalk P2P is a self-hosted, open-source video conferencing platform using direct peer-to-peer WebRTC connections for fast, secure real-time communication. Deploy on your own server in minutes. Enjoy unlimited rooms, no time limits, end-to-end privacy, and a rich feature set - all under your control.

## Recall.ai - API for meeting recording

[Recall.ai](#) – an API for recording Zoom, Google Meet, Microsoft Teams, and in-person meetings.

- ▶ 🌟 Why MiroTalk P2P?
- ▶ 🚀 Features
- ▼ ⚡ Quick start

Start in 6 commands:

```
git clone https://github.com/miroslavpejic85/mirotalk.git
cd mirotalk
cp .env.template .env
```

```
cp app/src/config.template.js app/src/config.js
npm install
npm start
```

Open <http://localhost:3000> - done!
