```
[3.11] gh-135034: Normalize link targets in tarfile, add
os.path.realpath(strict='allow_missing') (GH-135037) (GH-135068)

Addresses CVEs 2024-12718, 2025-4138, 2025-4330, and 2025-4517.
(cherry picked from commit 3612d8f)
(cherry picked from commit c358142)

```
@@ -352,10 +352,26 @@ the :mod:`glob` module.)
352 352     links encountered in the path (if they are supported by the operating
353 353     system).
354 354
355     -   If a path doesn't exist or a symlink loop is encountered, and *strict* is
356     -   ``True``, :exc:`OSError` is raised. If *strict* is ``False``, the path is
357     -   resolved as far as possible and any remainder is appended without checking
358     -   whether it exists.
    355 +   By default, the path is evaluated up to the first component that does not
    356 +   exist, is a symlink loop, or whose evaluation raises :exc:`OSError`.
    357 +   All such components are appended unchanged to the existing part of the path.
    358 +
    359 +   Some errors that are handled this way include "access denied", "not a
    360 +   directory", or "bad argument to internal function". Thus, the
    361 +   resulting path may be missing or inaccessible, may still contain
    362 +   links or loops, and may traverse non-directories.
    363 +
    364 +   This behavior can be modified by keyword arguments:
    365 +
    366 +   If *strict* is ``True``, the first error encountered when evaluating the
      path is
    367 +   re-raised.
    368 +   In particular, :exc:`FileNotFoundError` is raised if *path* does not exist,
```

```
      369 +    or another :exc:`OSError` if it is otherwise inaccessible.
      370 +
      371 +    If *strict* is :py:data:`os.path.ALLOW_MISSING`, errors other than
      372 +    :exc:`FileNotFoundError` are re-raised (as with ``strict=True``).
      373 +    Thus, the returned path will not contain any symbolic links, but the named
      374 +    file and some of its parent directories may be missing.
359   375
360   376        .. note::
361   377           This function emulates the operating system's procedure for making a path

2786  2786      check if the *strict* paramater is available.
2787  2787      (Contributed by Thomas Dwyer and Victor Stinner for :gh:`102988` to improve
2788  2788      the CVE-2023-27043 fix.)
      2789  +
      2790  +
      2791  + Notable changes in 3.11.13
      2792  + ==========================
      2793  +
      2794  + os.path
      2795  + -------
      2796  +
      2797  + * The *strict* parameter to :func:`os.path.realpath` accepts a new value,
      2798  +   :data:`os.path.ALLOW_MISSING`.
      2799  +   If used, errors other than :exc:`FileNotFoundError` will be re-raised;
      2800  +   the resulting path can be missing but it will be free of symlinks.
      2801  +   (Contributed by Petr Viktorin for CVE 2025-4517.)
      2802  +
      2803  + tarfile
      2804  + -------
      2805  +
      2806  + * :func:`~tarfile.data_filter` now normalizes symbolic link targets in order
               to
      2807  +   avoid path traversal attacks.
      2808  +   (Contributed by Petr Viktorin in :gh:`127987` and CVE 2025-4138.)
      2809  + * :func:`~tarfile.TarFile.extractall` now skips fixing up directory
               attributes
      2810  +   when a directory was removed or replaced by another kind of file.
      2811  +   (Contributed by Petr Viktorin in :gh:`127987` and CVE 2024-12718.)
      2812  + * :func:`~tarfile.TarFile.extract` and :func:`~tarfile.TarFile.extractall`
      2813  +   now (re-)apply the extraction filter when substituting a link (hard or
      2814  +   symbolic) with a copy of another archive member, and when fixing up
      2815  +   directory attributes.
      2816  +   The former raises a new exception, :exc:`~tarfile.LinkFallbackError`.
      2817  +   (Contributed by Petr Viktorin for CVE 2025-4330 and CVE 2024-12718.)
      2818  + * :func:`~tarfile.TarFile.extract` and :func:`~tarfile.TarFile.extractall`
```

```
2819 +   no longer extract rejected members when
2820 +   :func:`~tarfile.TarFile.errorlevel` is zero.
2821 +   (Contributed by Matt Prodani and Petr Viktorin in :gh:`112887`
2822 +   and CVE 2025-4435.)
