Commit 89a2294

steveukx authored 2 weeks ago · 8/8 · Verified

Environment Parsing (#1156)

- * Apply unsafe filtering for `--template` flag, vulnerable merge config and setting config by environment variable
- * Adds `diff.textconv`, `filter.clean` and `filter.smudge` to known exploitable `git config` operations.
- * Add environment variable scanning to unsafe plugin
- * Extend vulnerability scanning to additional filters, gpg and more configuration options
- * Update documentation for unsafe plugin
