Security Concern: Unauthenticated SQL Injection Vulnerability #15

Open

freeloader9527 opened last week

Hello,

I have identified a critical unauthenticated SQL injection vulnerability in the current version of the Hotel Management System.

I have a detailed reproduction report and PoC ready. Please let me know if you would like me to share a private Gist link here for your review, or if there is an alternative contact method (such as an email) to discuss the details securely.
