

Update NGAP Procedure Code according to 3GPP TS 38.413 version 16.14.0

 Merged [Tien-Thinh Nguyen](#) requested to merge [fix_ngap_procedure_code](#) into [deveLop](#) 2 months ago

Related Issue(s) / Merge Request(s)

Related issue: [#74 \(closed\)](#).

Description

Update NGAP Procedure code according to 3GPP TS 38.413 version 16.14.0: Max value should be 65 instead of 54 as in previous version.

Additional Notes

The corresponding handlers for the new NGAP procedure codes should be provided later on.

Owner

I don't understand this fix. It addresses the referenced issue, but e.g., a future version of the spec might add more messages, and without further change, the AMF will crash again.

Shouldn't you check that the procedure code number is smaller than the size of the array, and handle that by rejecting the message? that's what I would consider a fix, but this is not what is added here.
