New issue

cmd/go: trust layer bypass when using cgo and SWIG #78335

Closed

Labels NeedsFix Security release-blocker vulncheck or vulndb

Milestone Go1.27

neild opened 3 weeks ago · edited by dr2chase

Edits Contributor

A well-crafted SWIG source file could take advantage of a file-naming convention used inside the trust boundary of the cgo compiler. Doing so could result in arbitrary code execution during build time.

SWIG files are disallowed from using this convention.

Thank you to Juho Forsén of Mattermost for reporting this issue.

This is [CVE-2026-27140](#) and Go issue <https://go.dev/issue/78335>.

This is a PRIVATE issue for [CVE-2026-27140](#), tracked in <http://b/479232126> and fixed by <https://go-internal-review.git.corp.google.com/c/go/+3520>.

/cc @golang/security and @golang/release
