RCE on Grafana via sqlExpressions

Critical

Advisory ID:	CVE-2026-27876
Published:	2026-03-30
Product:	Grafana
CVSS Score:	9.1
CVSS Vector:	CVSS:3.1/AV:N/AC:L/PR:H/UI:N/S:C/C:H/I:H/A:H
Fixed Versions:	<11.6.0 >=11.6.14 <12.0.0 >=12.1.10 <12.2.0 >=12.2.8 <12.3.0 >=12.3.6 <12.4.0 >=12.4.2

Summary

A chained attack via SQL Expressions and a Grafana Enterprise plugin can lead to a remote arbitrary code execution impact (RCE). This is enabled by a feature in Grafana (OSS), so all users are always recommended to update to avoid future attack vectors going this path.

Only instances with the `sqlExpressions` feature toggle enabled are vulnerable.

Only instances in the following version ranges are affected:

- 11.6.0 (inclusive) to 11.6.14 (exclusive): 11.6.14 has the fix. 11.5 and below are not affected.
- 12.0.0 (inclusive) to 12.1.10 (exclusive): 12.1.10 has the fix. 12.0 did not receive an update, as it is end-of-life.
- 12.2.0 (inclusive) to 12.2.8 (exclusive): 12.2.8 has the fix.
- 12.3.0 (inclusive) to 12.3.6 (exclusive): 12.3.6 has the fix.
- 12.4.0 (inclusive) to 12.4.2 (exclusive): 12.4.2 has the fix. 13.0.0 and above also have the fix: no v13 release is affected.
