## Powered by AWS

Our cloud-hosting platform offers a low latency worldwide network for fast connections no matter where you are. Your data never leaves the region you select when you sign-up.

(Don't see your desired region?)

## We ❤️ Our Users

... and they have some pretty nice things to say about us, too! Here are just a few. [Click here](#) to see more about what people think about Snipe-IT.

“ I use Snipe-IT, via docker, just to record the IT assets I own in my home. But as a dev for over 40 years (really!) I wanted to post on here to celebrate what I believe to be the best-run software project I have come across. Period. And I mean this with either FOSS or Commerical projects. There is always a clear description of `_all_` changes in an update - no "various security and performance updates" so-called

behaviour. I know how much work all of these items take in addition to producing a great product/code so I appreciate it all the more. This is the example I always give others as a role-model for how to treat users. Congratulations snipe and all the team! ”

Paul

“ This tool seems to fit us well. We have wanted to do asset management for a while and we get hung up with the complexity of other tools. This one got us going quickly and easily. It is the right fit. ”

Mark F.

Higher Education

“ Being able to have so many sortable data fields for each item is incredible! Almost limitless possibilities of how to manage and track inventory. Management of consumable stock is also incredibly easy thanks to its limits and notifications. ”

Justin

Church of the Highlands

## Proud Sponsor of Let's Encrypt

Making the web safer for everyone!

# Sign-up for a hosted account and get premium support!

Hosted accounts get secure, reliable hosting with top-notch support and preferred priority for feature requests.
