Powered by AWS

Our cloud-hosting platform offers a low latency worldwide network for fast connections no matter where you are. Your data never leaves the region you select when you sign-up.

(Don't see your desired region?)

We ❤️ Our Users

... and they have some pretty nice things to say about us, too! Here are just a few. [Click here](#) to see more about what people think about Snipe-IT.

“I joined an accounting firm as an IT tech, and quickly grew tired of how the company had been trying to track their internal IT assets on an Excel spreadsheet, with predictably inaccurate results. The proprietary ITAM options were more expensive than anyone wanted to shell out for, and proprietary software has bitten me enough times that I wanted to avoid it if possible, so I researched some more,

part is that I didn't have to spend a penny to get it set up; all it took was some time and Linux-Fu. I'll be leaving this company soon, but I'm putting together lots of documentation so my successor can take over our Snipe-IT server. I know for sure that I'll be singing my praises of Snipe-IT wherever I go next, and I think I'll get an instance running to manage my inventory at home. That's one of the other beautiful things about it - It may be designed as an IT asset register, but it's so wonderfully customisable that I could probably use it for my 3D printing materials, record collection, spice rack, etc. Thank you so much for this amazing software. Much love <3 ʘʘ

Reece D.

N/A

“ I use Snipe-IT, via docker, just to record the IT assets I own in my home. But as a dev for over 40 years (really!) I wanted to post on here to celebrate what I believe to be the best-run software project I have come across. Period. And I mean this with either FOSS or Commercial projects. There is always a clear description of `_all_` changes in an update - no "various security and performance updates" so-called release notes! There is advanced warning of any changes to the underlying php/laravel so there is time to adapt. Plus the often-underrated commodity that changes are pretty much always backwards compatible/default to current behaviour. I know how much work all of these items take in addition to producing a great product/code so I appreciate it all the more. This is the example I always give others as a role-model for how to treat users. Congratulations snipe and all the team! ʘʘ

Paul

configuration, incredible features and intuitive use, it surpasses any kind of similar asset management solution, and the community is absolutely top notch. ”
