Unlimited Extension Changelog

Created: January 25, 2018

Version	Released Date	Change log
2.84	04/16/2026	Fixed : Fixed a permission issue in the Settings form.
2.83	03/16/2026	Fixed: Path traversal vulnerability in <code>download_file()</code> that could allow arbitrary file reads. Path traversal validation when extracting files from archives. Stale backups path option after server migration now auto-resets to default. Support for Divi5 Theme. Improved: Social share buttons replaced with lightweight static links (removed third-party JavaScript from Facebook, Twitter, and YouTube).

Version	Released Date	Change log
2.82	02/03/2026	Added: Added compression option (gzip or bzip2)
2.81	12/04/2025	Improved: Code improvements on activation.
2.80	11/07/2025	Fixed: Support for PHP 5.3. Improved: Upgraded to full Vue 3 framework for enhanced performance and reduced bundle size. Upgraded PHP and JavaScript dependencies.
2.79	10/05/2025	Fixed: Fixed a bug in our deployment - no actual changes in the plugins.
2.78	10/05/2025	Fixed: Fixed a bug when importing a file.
2.77	10/05/2025	Improved: Upgraded PHP and JavaScript dependencies.
2.76	09/08/2025	Added: Gzip compression support for file operations to improve backup file handling. Added clean log and running status for scheduled events. Update javascript dependencies.
