What version of Cscape do I need?

- Cscape 10 is a major new release that offers a variety of significant enhancements to the User Interface, Logic and Screen development. These advancements can be realized by any OCS user utilizing any current Horner OCS platform.

- In addition – Cscape 10 contains a large number exclusive features for the new Canvas line of All-in-one Controllers. This is especially true as it relates to the Canvas Advanced Graphics engine – where a number of screen development tools and graphics objects have been reimagined from the ground up.

- For Canvas users, Cscape 10 is required. We invite non-Canvas OCS users to transition to Cscape 10 on their desired schedule – proceeding as is customary

VS.

CSCAPE 10

with any major software release prior to its deployment in the field.

- For some time, both versions (Cscape 9.9 and Cscape 10) will be available as current releases on the Horner Automation web site. This will allow customers the flexibility to utilize the version that best meets their needs during this transition period.
