TOKUHIROM / Amon2-Plugin-Web-CSRFDefender-7.04 / Changes

```
1 Revision history for Perl extension Amon2-Plugin-Web-CSRFDefender
2
3 7.04 2026-03-01T00:38:17Z
4
5     - Use Crypt::SysRandom instead of reading /dev/urandom directly.
6     - Deprecated this module.
7
8 7.03 2014-09-22T05:38:57Z
9
10    - Fixed recursive requirements
11      (reported by lestrat++)
12
13 7.02 2014-08-18T04:58:01Z
14
15    [Mostly win32] [bug fix]
16    - Clear file handle if /dev/urandom is not available.
17
18 7.01 2014-07-31T21:08:10Z
19
20    - More secure random number generation.
21
22 7.00 2014-07-30T06:55:58Z
23
24    - Split from Amon2 core distribution
25    - Previous version generates csrf token by Amon2::Util::random_string.
26      It's bit unsecure. New version generates more secure random string ger
27    - Added new configuration parameter named 'csrf_token_generator'.
28      You can specify your favorite csrf token generation.
```
