Community update

Make training people stick with

Most organisations don't have a learner problem — they have a learning experience problem. Join us **27 May at 8:00 AM EST (GMT-5)** for a practical session with Moodle and ReadSpeaker on designing for real-world variability. Explore why training fails, how to close the hidden learning gap, and simple ways to improve engagement, completion, and confidence. Can't attend live? Register and we'll send you the recording.
