### Product Description

Looking for the missing link between social networking and e-commerce? Store plugin allows anyone to easily create an online store within social networks using mooSocial platform. By leveraging the power of commerce and social networking combined, companies can increase brand awareness and sells more while being able to keep their customer engaged thru social commerce activities. The Store plugin is mobile optimized and SEO friendly allowing store owners to target organic search traffic in addition to social commerce traffic.

Social commerce is the use of social network to perform e-commerce transaction. It is essential for any brands who wants to build online communities or conducting business online. Social commerce aims to assist companies keeping customers engaged with their brands, create incentives for revisit, provides a online platform for users to talk and discuss about their products. It is also a central source of user-generated content for potential customers to research, compare, get recommendation and ultimately make their purchase decisions.

Store plugins can be integrated with business page plugin and credits plugin. You can enable the integration at settings page of the plugin in admin panel.

+ If “Business plugin” is integrated, members need to open a business page before creating a new new store. Buyers can see list of products inside “products” tab of business profile. Buyer can write a review for business profile, can check to see if business profile is verified or not.....

+ If “credit plugin” is integrated, members can buy. product at stores plugin using credits inside eWallet.
