Connect to a VPN

Choose a VPN server and connect.

What is a VPN app?

A VPN app is a software application that secures the internet connection on your device and gives you more online privacy. A [VPN](#) works in the background to send the traffic traveling to and from your device through a secure, encrypted VPN tunnel. It also hides your IP address and virtual location and makes it harder for hackers to target you.

VPN apps allow you to use a [VPN connection](#) on various devices, including

Securely access content

Safely catch up on legal content from your home country anywhere, even abroad. Using a VPN on your device gives you more online freedom while protecting your online traffic.

Change your IP address

Connect to a VPN server in your chosen location, and it'll look like you're browsing from there. Hide your virtual location from snoopers and enjoy more online privacy.

Protect your device

Boost the security of your device when using public Wi-Fi. A VPN secures your internet connection with encryption and blocks many online threats.

Free VPN download options

Free VPN download options include limited versions of paid VPN services, ad-supported apps, data-capped plans, and basic mobile-based tools. These options may provide some temporary privacy benefits, but speed or data restrictions as well as weak security features will likely result in a poor experience.

What can I do with a free VPN app?

Free VPNs offer some basic privacy features such as changing your IP. People also use free VPN apps to bypass government censorship, access their services on restrictive networks, and boost their privacy. However, the severe limitations of free VPNs, such as weak encryption, ads, and data caps, can make these goals difficult to achieve.

Nathan Corliss
@MrNathanCorliss

This is completely unsolicited praise, [@NordVPN](#), is very helpful as an advertiser testing search ads, and as a work-anywhere person who needs to ensure I have a safe internet connection. Great value. So easy to use, I actually use it. Keep up the good work.
