

Master your universe.

Nova is the simplest and fastest way to build production-ready administration panels using Laravel. Simply **composer require laravel/nova,nova:install**, and you're ready to go.

[Buy a license](#)[Read the docs](#)

The screenshot displays the Laravel Nova interface. On the left is a sidebar with navigation links: Dashboards (Main, User Insights), Resources (Addresses, Comments, Posts, Purchases, Roles, Tags, Users), and a 'Create User' button. The main content area shows 'Current Users' (7) and 'New Users' (75%) with a progress bar. Below this is a 'Users' table with columns: ID, AVATAR, NAME, EMAIL, ADMIN, and 2FA. The table lists 7 users, with Taylor Otwell at the bottom. A 'Take the video tour' button is overlaid on the bottom left. The footer indicates the panel is powered by Laravel Nova v4.0.3 and is © 2022 by Taylor Otwell and David Hemphill.

ID	AVATAR	NAME	EMAIL	ADMIN	2FA
7		Mior Zaki	mior@nova.laravel.com	✓	✓
6		Jess Archer	jess@nova.laravel.com	✗	✓
5		Dries Vints	dries@nova.laravel.com	✗	✓
4		Ian Landsman	ian@nova.laravel.com	✗	✓
3		Mohamed Said	mohamed@nova.laravel.com	✗	✓
2		David Hemphill	davidlee.hemphill@nova.laravel.com	✓	✓
1		Taylor Otwell	taylor@nova.laravel.com	✓	✗

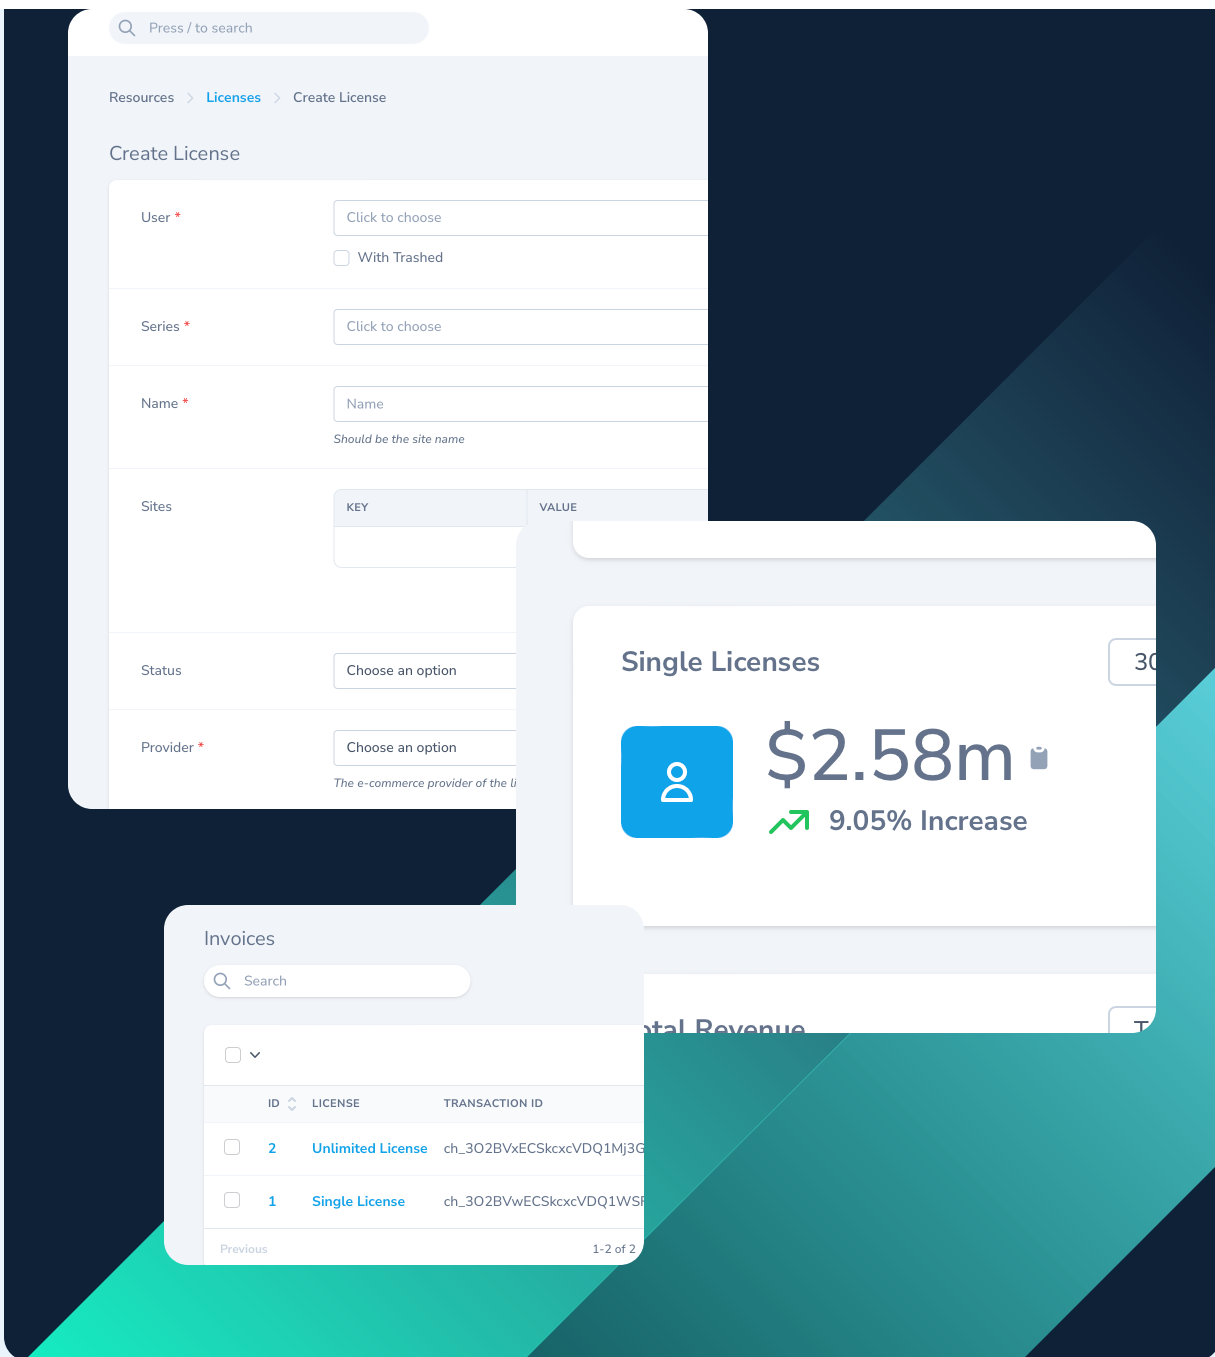

Craft complete backends in minutes.

Nova allows you to create beautiful, easy-to-use, and complete application backends that handle all of your needs.

Gone are the days of cobbling together lackluster administration panels. Nova is designed and crafted by the Laravel team, so it integrates perfectly with the framework.

Nova is the easiest way to quickly manage your data, view your key application metrics, or handle any custom process your application requires.

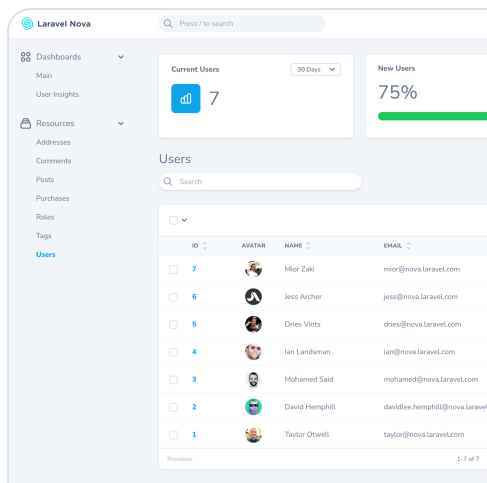

Out of this world features

Resource management, actions, filters, lenses, metrics, and more. You can use Nova to easily craft a powerful, robust backend administration panel in minutes.

Resource Management

Nova provides a full CRUD interface for your Eloquent models. Every type of Eloquent relationship is fully supported. Need to edit the pivot data on your polymorphic many-to-many relationship? We have you covered.

Actions

Actions are PHP tasks you can run against a resource or batch of resources. Have an action that takes a while? No problem, Nova's queued actions will keep your administration panel feeling snappy.

Actions ▾

ID	NAME	INITIATED BY	TARGET
6	Logged in	David Hemphill	User: David
2	Loaded in	David Hemphill	User: David

Filters

Write custom filters to offer users a quick glance at different segments of your data. To get you started, we've included built-in filters for “soft deleted” resources.

Lenses

Need to dig into a specialized view of your resources? No problem. Add lenses to your resource to take full control over the entire Eloquent query used to retrieve your data.

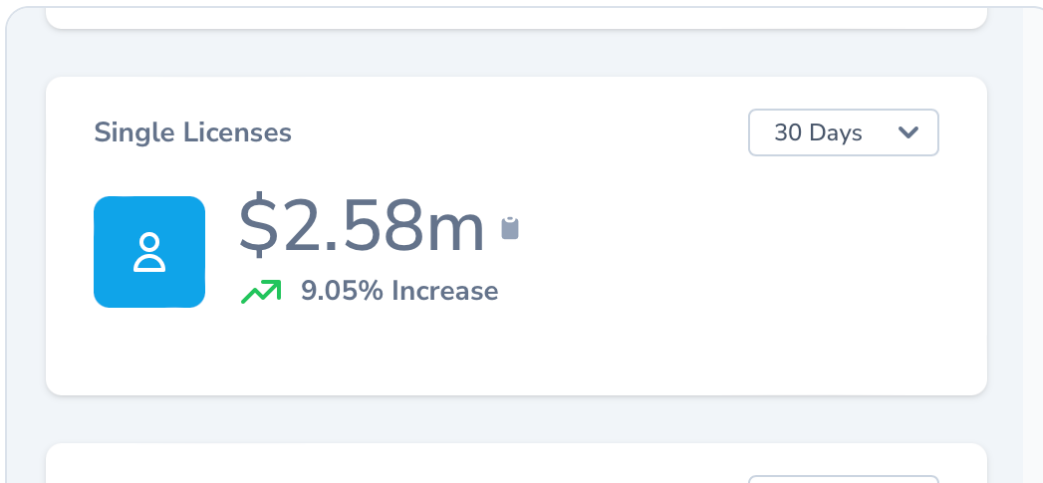

Custom Tools

Nova offers CLI generators for scaffolding your own custom tools. We'll give you a Vue component and infinite possibilities. Build the custom tools your business requires, or build the next great Nova add-on and share it with the world.

Metrics

Nova makes it painless to quickly display custom metrics for your application, allowing you to generate three types of graphs in seconds. To put the cherry on top, we've included query helpers so it's all easy as pie.

Authorization

Nova is beautifully integrated with Laravel's existing authorization policies. Let your Nova resources automatically leverage your existing application policies to determine a user's abilities. Fine-grained authorization support is even provided for relationships, tools, actions, lenses, and fields.

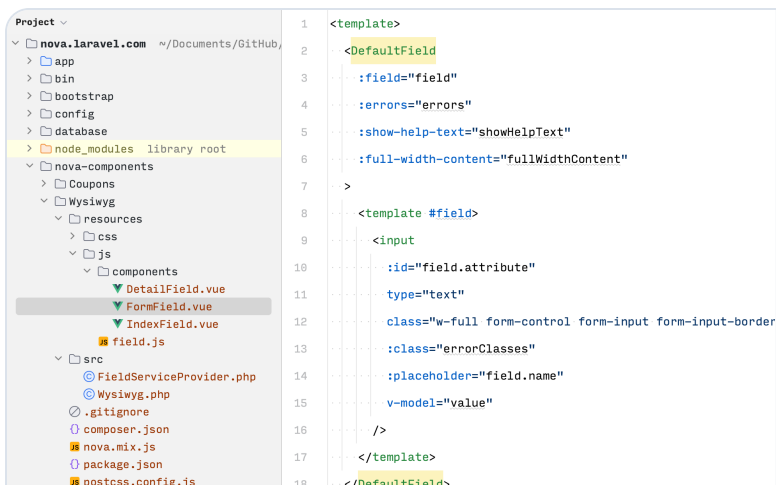

Email Address

Password

Custom Fields

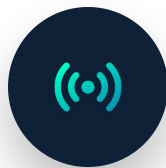

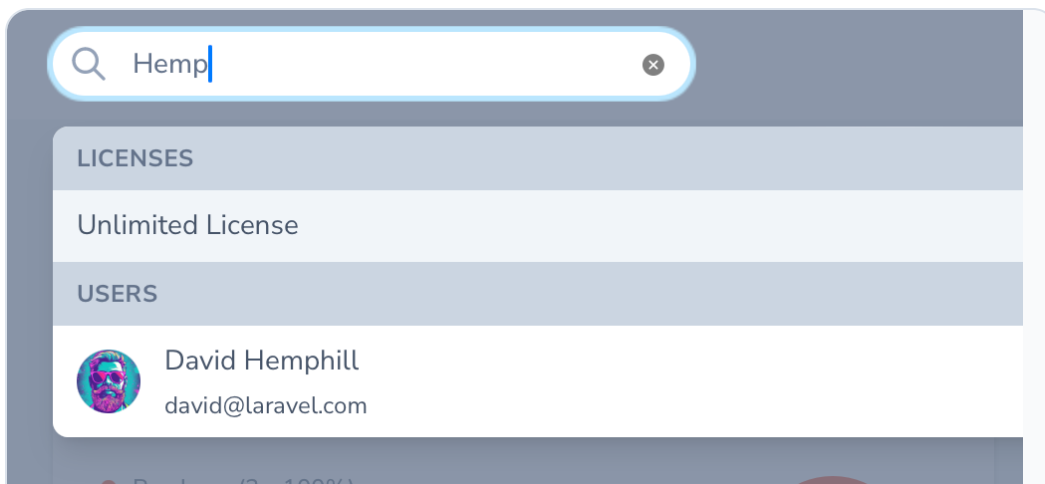

Need a field type that isn't included with Nova? No problem - use the Nova CLI to generate a custom field and take total control over its implementation and design.

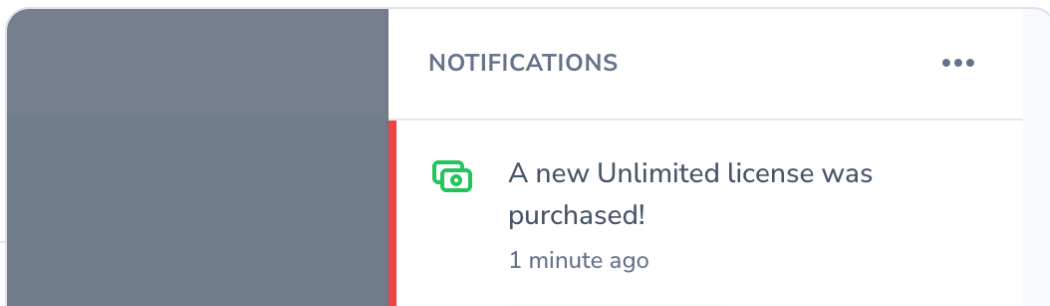

Powerful Search

Feel the power of the Laravel ecosystem by linking your Nova administration panel with Laravel Scout. Once you do, you'll get blazing fast search results powered by Algolia and the cloud.

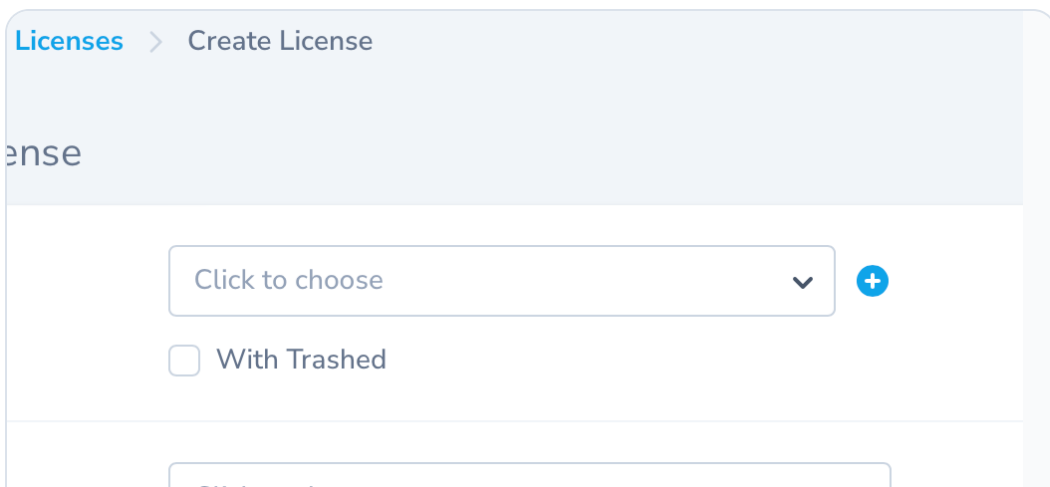

Notifications

Notify your admins about important events like new sales, cancellations, and more by sending notifications directly to your Nova admin.

Inline Relationships

Manage relations in the same form you create and edit resources. Nova's powerful relationship support allows you to define painless editing workflows.

Conditional Fields

Nova's robust field dependency support allows you to show fields based on the values of other fields with a few lines of code - no custom fields required.

Don't take our word for it...

"I use Nova on almost every Laravel app I build. We've used it to power the Lemon Squeezy back office since the beginning. It's by far the easiest and most powerful way to build an admin backend for your app."

Gilbert Pellegrom

Co-founder / CTO of Lemon Squeezy

"I've used Nova for years and it's handled everything I've thrown at it. The amount of time it's saved me has more than paid for itself."

Alex Garrett-Smith

Founder of Codecourse

"I bought Nova on the first day it was launched and never stopped learning more about it, to the point of releasing the first ever Nova course that dives into its secrets and powerful features that it offers for any Laravel app."

Bruno Falcão

Creator of Master Nova course

“Nova is core to customer support at Chipper CI, letting us get customer information quickly to help resolve issues.”

Chris Fidao
Founder of Chipper CI

“We've built Ranium's website CMS entirely on Nova, allowing us to swiftly create a custom job board and blog that perfectly fits our requirements, all seamlessly integrated within our CMS. Nova has been a game-changer!”

Abbas Ali
Developer at Ranium

“Using Laravel Nova at <http://Verse.ai> has been a game changer. It's crazy simple for our devs and has made our back office extremely happy with a serious ROI.”

Joel Abitan
VP of Engineering at Verse.ai

“Nova shines by its incredible ease of use. I not only recommended it to countless clients, but I also made sure to have my personal license always up to date.”

Benjamin Crozat
Indie Hacker and Blogger

“We replaced our custom-built admin panel with Nova and couldn't be happier. It's simple but flexible. An incredible time saver.”

Trevor Gehman
CTO of Clearstream

“Laravel Nova helps us ship new features faster and empower our customer support team by reducing the boilerplate in maintaining our own admin tools.”

Dwight Conrad Watson
COO of Roomies.com

Take Nova for a spin

Seeing is believing. Head on over to our Nova demo and see an example of Nova in action. You'll be able to experiment with resource management, metrics, and more.
