

Push notifications made easy

ntfy (pronounced *notify*) is a simple HTTP-based pub-sub notification service. It allows you to send notifications to your phone or desktop via scripts from any computer, and/or using a REST API. It's infinitely flexible, and 100% free software.

Notifications since 2022

GitHub stars

Google Play

App Store

Send push notifications from your app or script

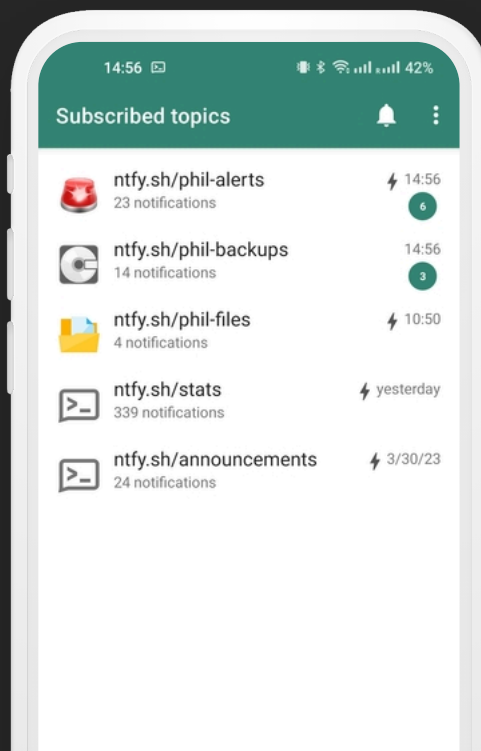

[Publishing messages](#) can be done via PUT or POST. Topics are created on the fly by subscribing or publishing to them. If you use ntfy without sign-up, the topic is essentially a password, so pick something that's not easily guessable. If you [purchase ntfy_Pro](#), you can reserve topic names instead.

curl ntfy CLI JS Go PS Python

```
curl \
  -d "Backup successful 😊" \
  ntfy.sh/mytopic
```

Receive notifications on your phone

Subscribe to a topic and receive notifications, with different priorities, attachments, action buttons, tags & emojis, and even for automation.

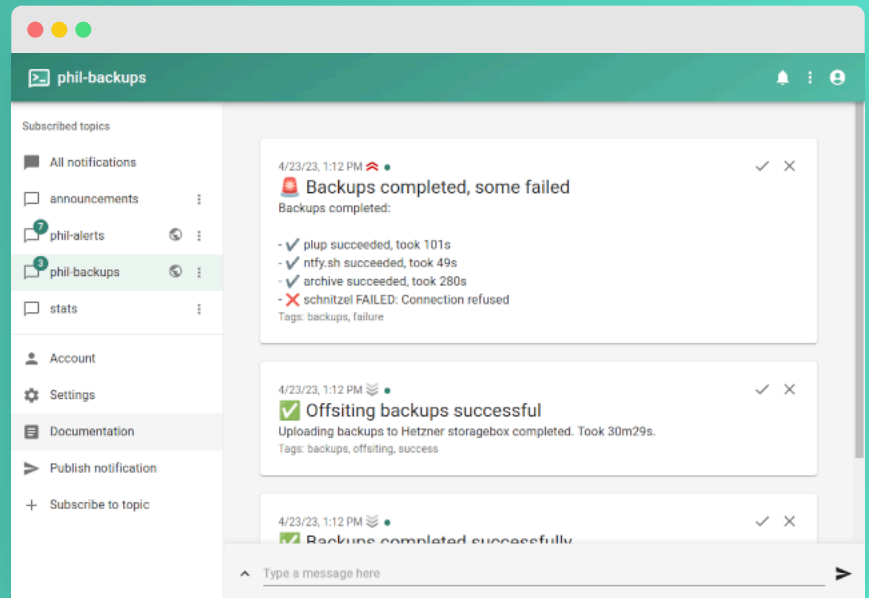

Subscribe to a topic, and instantly receive notifications

Alert yourself about unauthorized logins, when your show was downloaded, or when your home automation sensors detect movement in the yard. ntfy hooks into anything and everything.

Or get notified on your computer

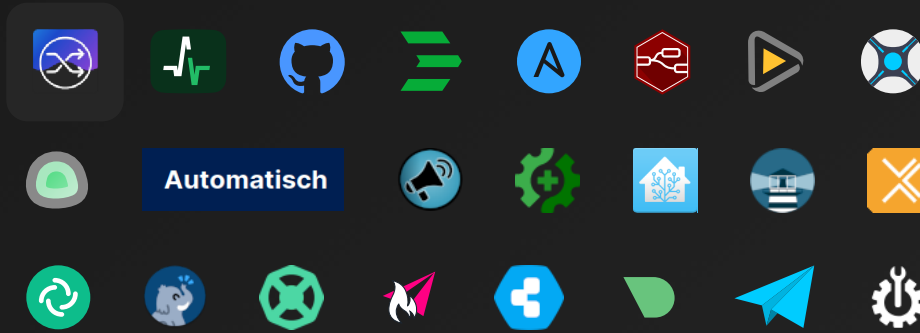

You can use the web app to subscribe to topics as well. If you do, notifications will pop up as desktop notifications. Simply type in the topic name and click the Subscribe button. The browser will keep a connection open and listen for incoming notifications.

Integrate with your favorite tools

Publishing messages is just a HTTP request, so pretty much everything under the sun can [integrate with ntfy](#).

[changedetection.io](#)

Whether it's receiving alerts from [cronjobs](#), or when a [GitHub Actions](#) pipeline finishes, or when a [new episode of your TV show](#) is available, or [when any website has a change](#) ❤️, ntfy will let you know.

Pricing

Try ntfy for free without sign-up, or check out our paid plans. Or, since it's open source, you can always self-host it.

Monthly

Annually

Pro

\$10 / month

This is the best value plan. Lots of messages, and large attachments.

Subscribe

✓ 20k daily messages

✓ 10 reserved topics 🥰

✓ 20 phone calls

✓ 250 daily emails

✓ 250 MB per attachment

✓ Email support

“Hands down the best notification service I've ever used, and I have used them all.”

– Joe Harrison

“Thank you”

A rare app that solves a problem in the most straightforward way possible. Thank you very much developer.

– Jonathan Paul

“Amazing!”

Awesome work, app and platform are amazing!

– Craig Miller

“FOSS is the future”

Absolutely fantastic job, dude! ❤️ Keep it up, FOSS is the future! 🌟

– Vivek Kushal

“Super simple to use”

Amazing app that lets me have notifications for many of my server apps that I run, and also being super simple to use.
