As immediate action, update the affected plugin. If you're unable to do so, ask your hosting provider or web developer for help.

Note by Patchstack

Refer to <https://smartslider.helpscoutdocs.com/article/2144-wordpress-security-advisory-smart-slider-3-pro-3-5-1-35-compromise> for cleanup assistance. Note that the mitigation rule does not prevent total exploitation of the malware that may have been embedded.

10 Backdoor

A backdoor is a hidden method of access to a system that allows an attacker to gain access and exploit your system. It can be used to execute a payload.

CVSS score is a way to evaluate and rank reported vulnerabilities in a standardized and repeatable way but which is not ideal for WordPress.

Solutions

We advise to mitigate or resolve the vulnerability immediately.
