Lenovo is committed to developing products and services that adhere to the highest security standards in order to protect our customers and their data. The Lenovo Product Security (PSIRT) investigates reported vulnerabilities and provides information by publishing Security Advisories to this page.

Lenovo also publishes Announcements (https://support.lenovo.com/us/en/product_security/product-security-announcements), which may include security related advice, reactive steps and details to supplement an advisory.

Bookmark this page for quick access to this document: https://support.lenovo.com/product_security/home (https://support.lenovo.com/us/en/product_security/home)

To report a vulnerability, click [here](https://support.lenovo.com/us/en/product_security/reporting-a-vulnerability) (https://support.lenovo.com/us/en/product_security/reporting-a-vulnerability).

To review our Vulnerability Disclosure Policy, click [here](https://support.lenovo.com/us/en/product_security/vulnerability-disclosure-policy). (https://support.lenovo.com/us/en/product_security/vulnerability-disclosure-policy)

Lenovo only evaluates security vulnerabilities against the most current updates available at [support.lenovo.com](http://support.lenovo.com/us/en) (<http://support.lenovo.com/us/en>) and recommends operating at the latest software, software applications and drivers (BIOS, BMC/TSM, FW, etc). For security vulnerabilities in the Operating System (OS), Lenovo recommends that you contact the vendor or OEM.

In addition to operating at the latest versions, you can limit your risks by following good computing practices, including the following:

- Limit access to only known and trusted users
- Ensure access to your device settings (such as BIOS) is protected by a strong password
- Make sure your computer is protected with anti-virus and all necessary security patches and updates
- Secure notebook and mobile devices at all times by locking them up or carrying them with you
- If you must leave your device unattended, make sure it requires a secure password to start up or wake up
- Install only well-vetted, trusted applications and avoid clicking links from untrusted sources

Refer to the current Advisories for information about the latest vulnerabilities. Older advisories have been moved and may be found in the [Product Security Advisory Archive](https://support.lenovo.com/us/en/solutions/ps500002) (<https://support.lenovo.com/us/en/solutions/ps500002>).
