Slovak (Slovensky)

Turkish (Türkçe)

## ⚡ Upgrade

We recommend the **automatic upgrade**. If you're running **version 2.2+**, Piwigo will tell you which plugins may be not compatible with Piwigo 16 before upgrade.

Automatic upgrade ([guides/update/automatic](https://piwigo.org/guides/update/automatic))

---

If you're running **Piwigo 16.x** you can also download the **16.x\_to\_16.3.0.zip** archive that contains all new and modified files. Once you have extracted the files, transfer them onto your web server with a FTP client over your Piwigo 16.x installation. No database upgrade is required.

[16.x\\_to\\_16.3.0.zip](https://piwigo.org/download/dlcounter.php?code=16xto1630) ([//piwigo.org/download/dlcounter.php?code=16xto1630](https://piwigo.org/download/dlcounter.php?code=16xto1630))

---

If you are running a version older than 16 and do not want to use the automatic upgrade, then follow the **manual upgrade**.

Manual Upgrade ([guides/update/manual](https://piwigo.org/guides/update/manual))
