InfluxDB 3 Core

Get started in seconds with InfluxDB 3 Core, an open source, recent data engine under MIT/Apache 2 open source license. Purpose-built for real-time use cases on top of the InfluxDB 3 engine, Core leverages new in-memory caches for high-speed recent data queries and adds a new Processing Engine for ETL and rich data analysis.

[Download](#)

- ✓ Single-node time series data engine
- ✓ Optimized for real-time use cases
- ✓ Sub-10ms recent-data queries with last-value cache
- ✓ Processing Engine for real-time transformation and embedded intelligence
- ✓ Easy integration - APIs, tools, client libraries, and powerful integrations with the tools you love, including Grafana

InfluxDB 3 Enterprise

Fast to deploy anywhere, InfluxDB 3 Enterprise is a high-availability, high-performance time series database built for production workloads requiring enterprise-grade features. It extends InfluxDB 3 Core with capabilities including fine-grained security, read replication, and more.

Download

- ✓ Highly available, single-node time series database
- ✓ Optimized for any use case (real-time, AI, ML, and historic)
- ✓ Sub-10ms recent-data queries with last-value cache
- ✓ Processing Engine for real-time transformation and embedded intelligence
- ✓ Easy integration - APIs, tools, client libraries, and powerful integrations with the tools you love, including Grafana
- ✓ Admin UI
- ✓ Retention period support by database and table
- ✓ Premium technical support - paid users only

InfluxDB 3 Explorer

Visualize, query, and manage your data stored in InfluxDB 3 Core and Enterprise with an intuitive, browser-based user interface.

Download

- ✓ Create and manage InfluxDB 3 databases, tokens, plugins and more
- ✓ Built-in Plugin Library for easily discovering and deploying new plugins
- ✓ Query data with a built-in visualizer for enhanced data insights
- ✓ Write new data and setup Telegraf configurations
- ✓ Configure and manage Last Value and Distinct Values caches

Telegraf

Platform

Docker Image

Version

Telegraf v1.39.2

```
# Debian-based image
docker pull telegraf
# Alpine-based image
docker pull telegraf:alpine
```

- Popular (5B+ downloads) lightweight agent to collect and send data
- Connect any data source to any output in minutes with over 5k+ integrations (e.g.,

InfluxDB CLI 3.0

Platform

macOS binary (x86_64) ▼

Version

influxctl v2.12.1 ▼

SHA256: [f1071e61bd13fbb580937afd0c86afeccafdac639b19aad8cbd292ebb27ae7f7](#)https://dl.influxdata.com/influxctl/releases/influxctl-v2.12.1-darwin-x86_64.zip

The influxctl command line interface (CLI) lets you perform administrative tasks in an InfluxDB v3 instance, such as:

- Single-tenant cloud implementations with InfluxDB Cloud Dedicated
- On-prem, private cloud, and hybrid deployments with InfluxDB Clustered

[Documentation](#)[Register to get release updates](#) →

Client Libraries

InfluxDB includes a set of Client Libraries that are language-specific packages that integrate with the InfluxDB v2 API. The following client libraries are available:
