## CRM Rukovoditel

I want to introduce my new open-source software: [www.rukovoditel.net](http://www.rukovoditel.net)

This is like qdPM but it has more configuration options allowing you to build your own application. The ability to design your database is the main difference between analogs. [Read More](#)

### Top Features

- Users Access Controls
- Fully Configurable
- Custom Report Generator
- Time Tracking & Time Report
- Customer Support Tickets

### Support

You can use direct [contact form](#).  
My name is Sergey. I always reply to emails within 24-48 hours.

### qdPM-EX

- More configuration
- More Customers Interaction
- More Users Interaction
- More Modules

## Save your time using qdPM!

A powerful report generator allows you to analyze Project data from numerous views including Across Project or within Project.

You can view Data by Project Type such as Support Projects, Task Status such as all Open Tasks or Completed Tasks, Task Assignment such as all your own Tasks.

### Improve interaction with your customers

Customers interact using a Ticket System that is integrated into Task management. When responding to a Ticket, you can easily create one or more Tasks associated with that Ticket that the Customer does not see.

Once the Task is completed you can advise the Customer and close the Ticket.

### Feel free configuring qdPM

Elements such as the Project status, Project types, Task status as well as many others are completely configurable.

Also qdPM allows you to add extra fields to Projects, Tasks & Users and you can configure the project management as you need.

## qdPM User Manual
