

Security Updates

SmartTV software updates

Samsung SmartTV's software update support policy is as follows.

SmartTV(including Voice Assistance(Bixby)) is guaranteed to support and receive software updates for at least 5 years from launch of product. We will aim to provide additional support for critical updates and security patches after this period, where possible.

Samsung Visual Display is releasing Security Vulnerability Patch (SVP).

Note: If your Smart TV, Audio and Displays use the default update settings, the latest firmware will have been automatically installed. Also, you can download new version of firmware on <https://www.samsung.com>.

- How to check update setting: [Menu] -> [Support] ->[Software Update] -> Auto Update=ON.
- How to check Software Name: [Menu] -> [Support] ->[About This TV].
- Delivery time of security patches may vary depending on the regions and models.

SVP-DEC-2025

[SVE-2025-50124 \(CVE-2026-25203\)](#).

- Weakness : Samsung MagicINFO 9 Server Incorrect Default Permissions Local Privilege Escalation Vulnerability
- Patch information : The patch modifies verification logic of the input
