Powered by AWS

Our cloud-hosting platform offers a low latency worldwide network for fast connections no matter where you are. Your data never leaves the region you select when you sign-up.

(Don't see your desired region?)

We ❤️ Our Users

... and they have some pretty nice things to say about us, too! Here are just a few. [Click here](#) to see more about what people think about Snipe-IT.

“ I use Snipe-IT, via docker, just to record the IT assets I own in my home. But as a dev for over 40 years (really!) I wanted to post on here to celebrate what I believe to be the best-run software project I have come across. Period. And I mean this with either FOSS or Commerical projects. There is always a clear description of `_all_` changes in an update - no "various security and performance updates" so-called

behaviour. I know how much work all of these items take in addition to producing a great product/code so I appreciate it all the more. This is the example I always give others as a role-model for how to treat users. Congratulations snipe and all the team! ”

Paul

“ It's not only an inventory software to replace Excel. It's a whole methodology that takes you by the hand on managing your IT assets. ”

DIRCEU Pavon

Triple H Group

“ When our school district decided on a 1:1 device deployment, we needed a way to track which student had which device, keep maintenance records of a device and to keep track of which students purchased an optional protection plan for the device they were given. We also needed a low cost solution, and many of the options geared toward a 1:1 device deployment were very expensive. We came across Snipe-IT in our hunt for a way to keep accurate records of which students had which devices. After installing the software on-premises, we quickly realized Snipe-IT offered every thing the district needed at a great price, free! We watched development of the software over a period of 6 months. With a steady stream of updates, a very active development team, the ability to import users with ldap, and documentation that made the product rock solid, we made the decision to move the districts entire technology inventory to Snipe-IT software. Our 1:1 device deployment went without a hitch in August thanks to Snipe-IT software. ”
