## We ❤️ Our Users

... and they have some pretty nice things to say about us, too! Here are just a few. [Click here](#) to see more about what people think about Snipe-IT.

“ I joined an accounting firm as an IT tech, and quickly grew tired of how the company had been trying to track their internal IT assets on an Excel spreadsheet, with predictably inaccurate results. The proprietary ITAM options were more expensive than anyone wanted to shell out for, and proprietary software has bitten me enough times that I wanted to avoid it if possible, so I researched some more,

part is that I didn't have to spend a penny to get it set up; all it took was some time and Linux-Fu. I'll be leaving this company soon, but I'm putting together lots of documentation so my successor can take over our Snipe-IT server. I know for sure that I'll be singing my praises of Snipe-IT wherever I go next, and I think I'll get an instance running to manage my inventory at home. That's one of the other beautiful things about it - It may be designed as an IT asset register, but it's so wonderfully customisable that I could probably use it for my 3D printing materials, record collection, spice rack, etc. Thank you so much for this amazing software. Much love <3 ʘʘ

Reece D.

N/A

“Snipe-IT has brought order to chaos and has given us wonderful pigeon-holes for all of those important bits of information. Even better, we can ask better questions and get faster answers. We literally went from a three-ring binder to track equipment loans to an automated tool with barcode scanners. If you work on a team and are tracking things with a spreadsheet, level-up to Snipe-IT.”

Dennis Wurster

Eastman School of Music - University of Rochester

“I really like this project. I've used it at a couple of different places and everyone is always impressed with how easy it is to use.”
