MyT (Manage Your Team) - is a free open source task management and project management system, based on Yii Framework, easy to use and with a great perspective of growth for the future.

You can create one or more Projects and manage several types of Tasks for each one. You can also create and manage Timesheet hours.

Myt can send email notifications based on some events, such as Task assignments and Project associations. All features are configurable from the Administration Panel.

Features

- Task Management
- Document Management
- Automatic Notifications
- Bug Tracking
- Resource Details
- Smartphones/Tablet access
- Time Sheets
- Email Addresses

AI-generated apps that pass security review

Stop waiting on engineering. Build production-ready internal tools with AI—on your company data, in your cloud.

Retool lets you generate dashboards, admin panels, and workflows directly on your data. Type something like “Build me a revenue dashboard on my Stripe data” and get a working app with security, permissions, and... [Expand](#) ▾

I was searching a web based Project Management tool and i have found MyT. I have installed it on my public domain hosted on cheap host and I was pleasantly impressed by performance, more than good. Early I was not completely persuaded of this choose, but starting to use MyT I realized its potential. In my opinion its strengths are its ease of use, roles management , tasks management.
