Pro Cloud Server 6.1 ▼

WebEA

Pro Cloud Server v6.1 (Build 168)

22nd of December 2025

SBPI

- ServiceNow - Items will now include the table name

OSLC

- For WebEA users, Relationship Matrix will include relevant Source and Target elements associated with the associated Profile
- Abstraction connector will now correctly be created, and updated, via both create and update OSLC calls
- Element Partial Update will now correctly set the value for 'Date' type tagged value
- Element Partial Update will now correctly update predefined 'Enum' tagged value type
- Corrected issue where OSLC logic could generate invalid SQL when creating elements

WebEA

- Ensured that enabling Glossary Tooltips option no longer corrupts the display of Linked Document contents
- Corrected the "Invalid Token" error which could occur on the "Select Model" screen after a failed login
- Corrected 'Deprecated: curl_close()' error which could occur during model selection when using PHP 8.5.0
- Corrected PHP Warnings and Deprecated notices

Pro Cloud Server v6.1 (Build 167)

22nd of October 2025

Cloud Server

- Improve selection of DDLs for Custom Services/Integrations on the Add/Edit Data Provider screen
- Allow SQLServer database managers to start when running under Linux

Worker

- Included build 1714

Pro Cloud Server v6.1 (Build 166)

4th of August 2025

Cloud Server

- Database Drivers: EA now distributes PostgreSQL v17.06 database drivers for use with Native connections
- Performance improvement by caching signed in users for a short period of time

SBPI

- Jira - Remove use of deprecated Jira APIs
- Custom Integrations - Improve OAuth support

OSLC

- 'Status' property will now be set when creating and updating elements

Worker

- Included build 1713
