CVE-2026-22750: SSL bundle configuration silently bypassed in Spring Cloud Gateway

HIGH | APRIL 09, 2026 | CVE-2026-22750

Description

When configuring SSL bundles in Spring Cloud Gateway by using the configuration property `spring.ssl.bundle`, the configuration was silently ignored and the default SSL configuration was used instead.

Affected Spring Products and Versions

Spring Cloud Gateway:

- `4.2.0`

Note: The `4.2.x` branch is no longer under open source support. If you are using Spring Cloud Gateway `4.2.0` and are not an enterprise customer, you can upgrade to any Spring Cloud Gateway `4.2.x` release newer than `4.2.0` [available on Maven Central](#). Ideally if you are not an enterprise customer, you should be upgrading to `5.0.2` or `5.1.1` which are the current supported open source releases.

Mitigation

Reporting a vulnerability

To report a security vulnerability for a project within the Spring portfolio, see the [Security Policy](#)

**Affected
version(s)**[4.2.0](#)**Fix version**[4.2.1](#) or newer
