

About the security content of Magic Keyboard Firmware Update 2.0.6

This document describes the security content of Magic Keyboard Firmware Update 2.0.6.

About Apple security updates

For our customers' protection, Apple doesn't disclose, discuss, or confirm security issues until an investigation has occurred and patches or releases are available. Recent releases are listed on the [Apple security releases](#) page.

Apple security documents reference vulnerabilities by [CVE-ID](#) when possible.

For more information about security, see the [Apple Product Security](#) page.

Magic Keyboard Firmware Update 2.0.6

Released January 9, 2024

Bluetooth

Available for: Magic Keyboard; Magic Keyboard (2021); Magic Keyboard with Numeric Keypad; Magic Keyboard with Touch ID; and Magic Keyboard with Touch ID and Numeric Keypad

Impact: An attacker with physical access to the accessory may be able to extract its Bluetooth pairing key and monitor Bluetooth traffic

Description: A session management issue was addressed with improved checks.

CVE-2024-0230: Marc Newlin of SkySafe

Firmware updates are automatically delivered in the background while the Magic Keyboard is actively paired to a device running macOS, iOS, iPadOS, or tvOS.

You can check the firmware version of your Magic Keyboard in Bluetooth settings on your Mac. Go to System Settings > Bluetooth, then click on the Info button ⓘ next to your keyboard. After this firmware update is installed, the firmware version is 2.0.6.
