

About the security content of macOS Ventura 13.6.4

This document describes the security content of macOS Ventura 13.6.4.

About Apple security updates

For our customers' protection, Apple doesn't disclose, discuss, or confirm security issues until an investigation has occurred and patches or releases are available. Recent releases are listed on the [Apple security releases](#) page.

Apple security documents reference vulnerabilities by [CVE-ID](#) when possible.

For more information about security, see the [Apple Product Security](#) page.

macOS Ventura 13.6.4

Released January 22, 2024

Apple Neural Engine

Available for: macOS Ventura

Impact: An app may be able to execute arbitrary code with kernel privileges
