CVE-2026-2449 Improper neutralization of argument delimiters in a command

Peter Johansson

4 days ago · Updated

Follow

Severity: 9.1 Critical (9.0-10.0)

CVE ID: CVE-2026-2449

Details

This advisory address a vulnerability where commands can be injected into upKeeper Instant Privilege client internal communications.

Problem type: CWE-88

Impact: CAPEC-30

Applicability

This advisory is applicable only when

| Product Name | Impacted Version(s) | Fixed Version(s) | Released On |
|-----------------------------------|---------------------|------------------|-------------|
| upKeeper Instant Privilege Access | through 1.5.0 | 1.6.0.4576 | 2026-03-05 |

Impact

This vulnerability allows users to send commands to upKeeper Instant Privilege client service that will be executed with the rights and context of the local upKeeper Instant Privilege service.

Fix

This issue has been fixed by updating upKeeper Instant Privilege to 1.6.0.4576 version or later.

Acknowledgements

This vulnerability was reported by Tony Nilsson.
