

Changelog

v.14.3.3 (May 8, 2026)

Improvements:

1. FSE: Added "96px - 144px" spacing.

Bug Fixes:

1. Fixed a security issue where meta-box AJAX handlers allowed cross-post meta changes and arbitrary attachment deletion.

2. Fixed a security issue where post settings preset AJAX privilege bypass enabled stored admin XSS and arbitrary The7 post-meta changes.

3. Addressed CVE-2026-6646: Authenticated (Contributor+) Stored Cross-Site Scripting via Shortcode "link" parameter.

4. Made the "Imported" string translatable.

5. Made non-translatable strings in the import interface translatable.

v.14.3.2 (May 1, 2026)

Improvements:

1. Updated the it_IT language file.

Bug Fixes:

1. Fixed missing PNG files when importing Revolution Slider in the Small Store demo.
2. Corrected wrong image size on animation load.

v.14.3.1 (Apr 17, 2026)**Improvements:**

1. Improved Photo Scroller HTML markup.

Bug Fixes:

1. Made the Photo Scroller widget translatable.
2. Restored the video link icon in Porthole Slider.

v.14.3.0 (Apr 9, 2026)**Improvements:**

1. The7 is now compatible with WordPress 7.
2. Minor improvements to the FSE experience.

Bug Fixes:

1. Fixed WooCommerce mini-cart caching issues.
2. Resolved an issue where Single Page import did not work.

v.14.2.2 (Mar 25, 2026)**Improvements:**

1. Hardened Admin AJAX security.
2. Implemented small performance improvements.

Bug Fixes:

1. Fixed issues related to smooth-scroll default behavior.
2. Removed unnecessary tabs in the WPBakery "Button" widget.

v.14.2.1.1 (Feb 11, 2026)

New "Yoga & Pilates Studio" FSE demo: <https://the7.io/fse-pilates/>

v.14.2.1 (Feb 3, 2026)

Improvements:

1. Replaced the Gutena Forms plugin with Contact Form 7 integration in all FSE demos.

Bug Fixes:

1. Fixed broken element layout and appearance across various blocks.
2. Removed unnecessary extra margin from headings.
3. Fixed an issue where the "Flip Box" widget did not apply custom title color or font settings.
4. Removed extra borders inside carousel arrow elements.

v.14.2.0 (Jan 21, 2026)

New:

1. Added "FSE Product" pre-made site: <https://the7.io/fse-product/>
2. Released "The7 Post Types" plugin.

Improvements:

1. Added visual clues to help users choose whether to keep or remove demo content.
2. Updated WooCommerce templates to the latest version.

Bug Fixes:

1. Fixed formatting issues in the "My The7" interface.
2. Resolved an "Undefined variable \$swatch_html" warning in filter-attribute.php (line 1915).
3. Fixed an issue where navigation in the Filter by Brand widget displayed all items instead of filtering correctly.

v.14.0.2 (Jan 14, 2026)

Improvements:

1. Improved demo import success rates on servers with extensible caching systems.

Bug Fixes:

1. Fixed inconsistent bottom margins for headings between posts and pages.
2. Addressed a potential XSS security issue caused by tag injection.

v.14.0.1 (Dec 9, 2025)

New Features:

1. Added compatibility with the SEOPress plugin.

Improvements:

1. Renamed the "Popup" Elementor widget to "Loop Popup" for clarity.
2. Removed outdated and inconsistent networks from the social links list.

Bug Fixes:

1. Fixed missing icons in the Elementor AI demo.
2. Improved compatibility with the Jetpack plugin.
3. Resolved a potential PHP fatal error in the menu system.

v.14.0.0 (Dec 4, 2025)

New:

1. Introduced a new streamlined The7 Dashboard.
2. New demo – FSE Company: <https://the7.io/fse-company/>

Improvements:

1. Improved visual styling for the List block.
2. Updated gradient definitions in theme JSON.

3. Removed the global WordPress color palette when "Disable Gutenberg Block Editor CSS" is enabled.
4. Updated WooCommerce templates for compatibility.

Bug Fixes:

1. Fixed an issue where the database update could get stuck if a shortcode had an empty `get_less_file_name`.
2. Resolved broken Better Block Editor settings export/import caused by an option slug change.
3. Fixed a bug preventing custom colors from being unset in shortcodes.
4. Restored missing social icon block size overrides.
