crash, resulting in a denial of service, or possibly execute arbitrary code. ([CVE-2018-16839](#))

Brian Carpenter discovered that curl incorrectly handled memory when closing certain handles. A remote attacker could use this issue to cause curl to crash, resulting in a denial of service, or possibly execute arbitrary code. ([CVE-2018-16840](#))

Brian Carpenter discovered that the curl command-line tool incorrectly handled error messages. A remote attacker could possibly use this issue to obtain sensitive information. ([CVE-2018-16842](#))

Update instructions

In general, a standard system update will make all the necessary changes.
