# Submit #780204: Tenda CH22 V1.0.0.1 Command Injection

<b>Title</b>	Tenda CH22 V1.0.0.1 Command Injection
<b>Description</b>	A vulnerability was found in Tenda CH22 V1.0.0.1. Affected by this vulnerability is the function FormWriteFacMac of the file /goform/WriteFacMac of the component httpd. The manipulation of the argument mac with an unknown input leads to a command injection vulnerability. We found a Command Injection vulnerability in httpd , allows remote attackers to execute arbitrary OS commands from a crafted request. In FormWriteFacMac function, the value of the mac is inserted into command using doSystemCmd, and the value of mac will be finally executed.
