# Submit #780206: Tenda CH22 V1.0.0.1 Stack-based Buffer Overflow

**Title** Tenda CH22 V1.0.0.1 Stack-based Buffer Overflow

**Description** vulnerability was found in Tenda CH22 V1.0.0.1. Affected by this vulnerability is the function fromSetCfm of the file /goform/setcfm of the component httpd. The manipulation of the argument funcname and funcpara1 with an unknown input leads to a buffer overflow vulnerability. In fromSetCfm function, it reads in a user-provided parameter funcname and funcpara1. If the value of funcpara1 is save\_list\_data, the variable v14 will be passed to the sub\_39798 function without any length check. In fromSetCfm function, it reads in a user-provided parameter funcname and funcpara1. If the value of funcpara1 is save\_list\_data, the variable v14 will be passed to the sub\_39798 function without any length check.
